

Template for URSI AT-AP-RASC 2022 Extended Abstract

First A. Author⁽¹⁾, Second B. Author*⁽¹⁾, and Third C. Author⁽²⁾

(1) The ABC Company, Wash., DC, 20031, <http://xxx.xxxx.xxx>

(2) The Next Company, Neverland, USA

1 Introduction

These instructions provide guidance for the preparation of your Extended Abstract for an URSI Flagship conference. The margins and required spacing between different sections are demonstrated for author's convenience. To insert your text just highlight each section and replace with your own text. Otherwise, use this as a guideline to compare your final document in terms of margins, font sizes, and spacings.

2 Layout

The URSI Abstract should be single spaced, single column and **sized for A4 paper** according to this template. The paper should have a minimum of **250 words and be no longer than 1 page** and should be in English. These instructions extend over more than one page — your extended abstract should not.

The body text should be Times New Roman 10 pt., with headings in Times New Roman 12 pt. The top and bottom, left- and right-hand margins should be 2.5 cm (1 inch). Paragraphs should be separated with one blank line. Do not indent paragraphs.

The title should be centered according to this template. The author's (or authors') name and complete organizational affiliation should be two lines below the title. If there are multiple authors, the presenter is to be identified with an asterisk. The text should start three lines below the last name.

3 Extended Abstract

Apart from any references there should be one section only, entitled *Extended Abstract*.

Citations and references should follow IEEE format (as used by the *Radio Science Bulletin*). Citations can be of the form [1, 2] as is appropriate to the sentence, with the reference format illustrated at the end of this template.

Equations should be centered with the equation numbers right justified in the following format:

$$T' = \frac{r_e^2 \lambda^2 G C_s L \sec \theta \sqrt{\pi} \Gamma\left(\frac{\rho}{2}\right)}{4\pi^2 \Gamma\left(\frac{\rho+1}{2}\right)}. \quad (1)$$

Figures should include a caption beneath the figure (in Times Roman 10 pt.) and the caption should include the Figure number in bold. Figure 1 provides an example.

Likewise, tables should include a caption (in Times Roman 10 pt.) but this time above the table. The caption should include the table number in bold.
